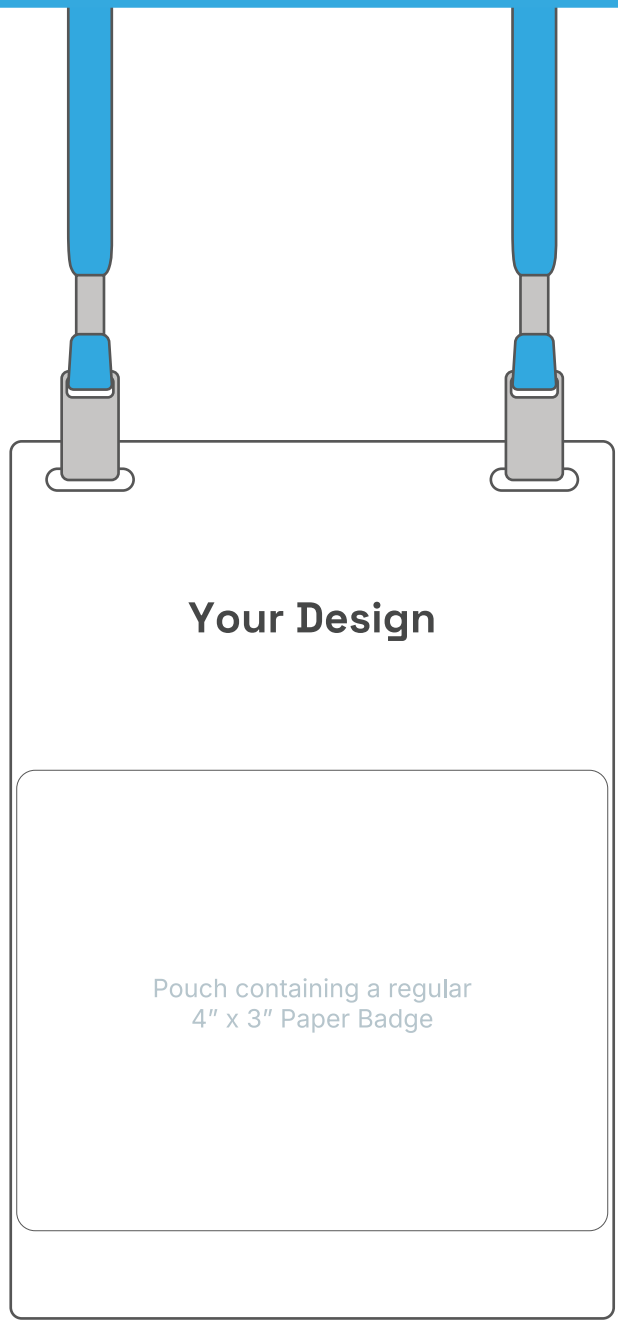
TEMPLATE FOR

4.33” x 6.3” Plastic Badge

With Double Slot



General Tips

- Place your artwork within the blue lines, on the "Your Design" layer (available as a layer in Ai)
- Edit and save your files in **CMYK**
- Outline all text before saving (select all layers, under the "Type" menu select "Create Outlines")
- Use vector artwork for best results. Images in your design should be **300ppi** or higher
- We recommend saving as a **PDF/X-1a**

Bleed Zone

Make sure your background extends 0.125" to fill the bleed and avoid white on edges when trimmed. We recommend a common top to bottom bleed color to avoid possible color misalignment along perforation.

Badge Edge

Badge outline

Safe Area

Make sure to keep important aspects of your design such as logos and text within the safe area.

Area covered with the pouch

This area will be hidden once the label is placed in the pouch. Make sure that all important design elements are outside this area.
